## Sendmail to be handled by another server?

Posted by Nineve - 2008/03/28 21:42

---

Hi,  
I was wondering if there was a way to change sendmail from using the server that the site is on to another server?  
:unsure:

Thanks in advance for any help.  
Please keep answers at the newb level....:blush:

Hi Nineve,

In site Global Configuration | Server (for Joomla! 1.5) you can specify an SMTP host. I don't think it has to be the hosting site at all.

Bob
