## Using the Joomla Calendar in a form

Posted by mariokrupik - 2007/07/28 17:29

---

Hi,

I am trying to get the joomla calendar to work inside a form of chronoforms within joomla1.5

I am using this html code:

```
<link href="style.css" rel="stylesheet" type="text/css">
```

```
<? JHTML::_('behavior.calendar'); ?>
```

```
<div id="form">
```

```
<table width="610px" class="table_form" cellspacing="0">
```

```
<tr>
```

```
<td class="td_dark" colspan="2"> Anreisettermin:
```

```
</td>
```

```
</tr>
```

```
<td class="text_links"> Anreisedatum:
```

```
</td>
```

```
<td class="text_rechts">
```

```
<input class="inputbox" type="text" name="dates" id="dates" size="15" maxlength="10" value="<? php echo $this->row->dates; ?>" />
```

```
<a href="#" onclick="return showCalendar('dates', 'dd-m-y');"></a>
```

```
Anfrage<br/></td>
```

```
</tr>
```

```
</table>
```

```
</div>
```

But I get an error message of the 2nd php variable.

so I exchanged:

```
value="<? php echo $this->row->dates; ?>"
```

```
with value="Your Date"
```

Now the Form Displays correctly, but I don't see the calendar, neither is it working

Mario

Hi Mario,

If its Joomla 1.0 then I would be able to help, but with joomla 1.5 I can't help you at least for now, Please let me know if you need the joomla 1.0 code.

Cheers

Max

If you can post me the code for joomla 1.0, I'm sure to get a whole step further.

thanks,

Mario

Mario,

You will need to add these lines of code :

```
<?php
mosCommonHTML::loadCalendar();
?>
<link rel="stylesheet" type="text/css" media="all" href="includes/js/calendar/calendar-mos.css" title="green" />
<script type="text/javascript" src="includes/js/calendar/calendar.js"></script>
<script type="text/javascript" src="includes/js/calendar/lang/calendar-en.js"></script>

<input class="inputbox" type="text" id="start_date" name="start_date" value="<?php echo $row->start_date; ?>"
size="11" maxlength="11" />
<input type="reset" class="button" value="..." onclick="return showCalendar('start_date', 'mm-dd-y');" />
```

---

HI,

got it working now.

```
<?php JHTML::_('behavior.calendar'); ?>
<link rel="stylesheet" href="templates/forms/anfrage.css" type="text/css">
<script type="text/javascript" src="includes/js/joomla.javascript.js"></script>

<input class="inputbox" type="text" name="anreise" id="anreise" size="25" maxlength="10" value="" />
<a href="#" onclick="return showCalendar('anreise', 'dd-mm-y');"></a>
```

too bad, it`s just not working in IE6.

Must be a problem with the Calendar itself, as the calendar is not working in the joomla backend either with ie6.

thanks again,  
Mario

Hi Guys

I'm using to use the Code in Post #1492, but I can't seem to get it to work with my Joomla 1.14 Version Using ChronosForm.

Please help with a Step by Step instructions

---

Hi texttoscreen,

Please check this thread the answers are there or are linked to from there IIRC.

Bob
